Combo cleaner is a software for MAC computers, and it helps to protect it from malware, viruses, Trojans and other internet threats. This software is equipped with award-winning scanning engines which find and remove all known zero-day malware.

The free version of Combo cleaner will scan and check your MAC for viruses completely free. It will let you know is your MAC infected by the viruses or no. In that case, if it is infected you will be able to buy a full version of combo cleaner and remove all the malware.

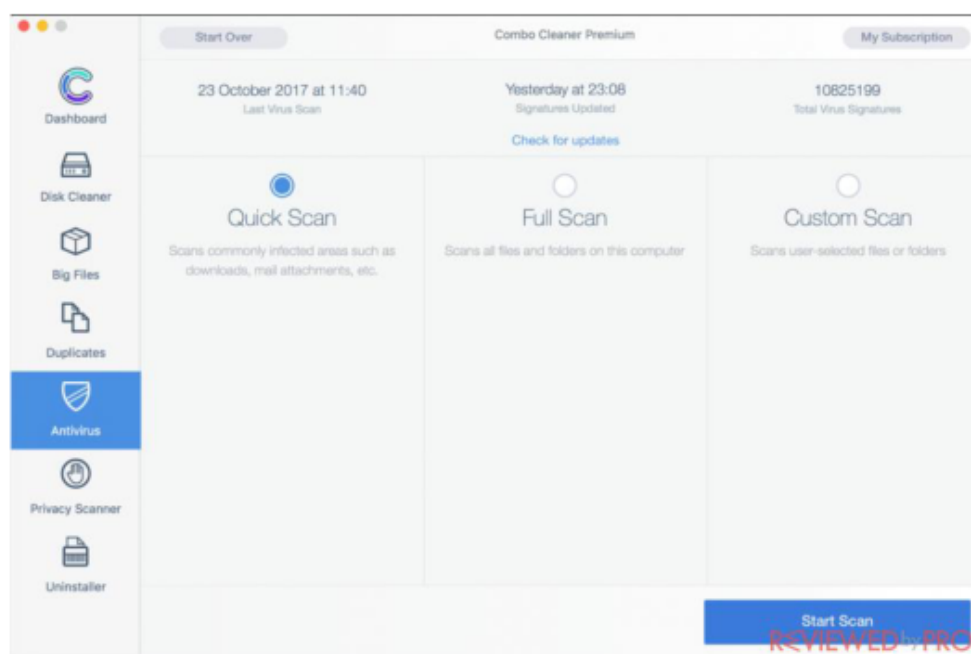

Also, it will clear your MAC from various junk files and will free up the disk storage space. Everything sounds very promising so let's download and test the software.

## Download and Installation

You can download the installation file from the official developer's website <https://www.combocleaner.com>. In the website, you can find all the information about the software's features, functionality, and prices. We have downloaded a free version at the beginning for testing purposes.

Download and installation process took very shortly. The package of installation file weights around 5 MB. Only, so it will not take much time to download it even with the low internet connection speed. The installation of the software is regular and very simple also. So, there is nothing to say much.

### User Interface

After the installation is done, we saw a very modern and friendly user interface. All buttons are clearly located on the left side of the software window. There is no need to look for
